PROFESSIONAL SUMMARY

Detail-oriented Junior Web Developer and Bachelor of Information Technology (Hons) graduate from Universiti Tun Hussein Onn Malaysia, with hands-on experience building full-stack web applications using React, Node.js, Express and PostgreSQL. Designed and delivered HopeOasis, a donation and medical-volunteering platform, as the sole developer — from relational database design and REST API development to a responsive React interface. Currently freelancing remotely, building, debugging and improving web projects for clients while independently managing scope, communication and deadlines. Bilingual in Arabic and English, with a solid foundation in UI/UX, networking and security fundamentals. Seeking a web development internship or junior role to contribute to production code and grow within a collaborative engineering team.

PROFESSIONAL EXPERIENCE

FREELANCE WEB DEVELOPER & ONLINE CONTRACTOR
REMOTE · 2025 – PRESENT

- Build, debug and enhance web applications and programming projects for individual clients using HTML5, CSS3, JavaScript and React, delivering clean, responsive and maintainable code.
- Translate client requirements into a clear technical scope, estimate timelines and deliver every project on schedule while working fully remotely.
- Diagnose and fix front-end bugs, layout issues and cross-browser inconsistencies, improving usability on mobile, tablet and desktop devices.
- Manage end-to-end client communication from requirements gathering through revisions and handover, and provide Arabic–English interpreting for online clients.

FOUNDER – ELECTRONICS RETAIL BUSINESS
KHARTOUM, SUDAN · MAY 2020 – NOV 2021

- Founded and ran a small retail business selling headphones and earbuds, handling sales, stock management, supplier orders and after-sales customer support.
- Marketed products through WhatsApp and Facebook, running promotions and responding to customer enquiries in real time to build a returning customer base.

PROJECTS

HopeOasis – Donation & Medical Volunteering Platform
Final Year Project (Solo) · Oct 2024 – Feb 2025
React.js · Node.js · Express.js · PostgreSQL · REST APIs · Bootstrap

- Designed and built, as the sole developer, a full-stack platform that directs monetary and medical-supply donations to conflict-affected communities in Sudan.
- Developed a responsive React and Bootstrap front end and connected it through Axios to a RESTful API built with Node.js and Express.
- Designed the PostgreSQL database schema for users, donations and volunteer appointments, structuring relationships to keep data consistent and queries efficient.
- Implemented donation tracking with impact updates for donors, plus an online scheduler that lets medical professionals volunteer consultation time.

Personal Portfolio Website
Oct 2024 – Nov 2024
HTML5 · CSS3 · JavaScript · GitHub Pages

- Built and deployed a fully responsive portfolio on GitHub Pages that showcases projects and skills across mobile, tablet and desktop screens.
- Added interactive elements and smooth navigation with vanilla JavaScript, keeping the site lightweight and fast without external frameworks.
